THE EUROPEAN FLOW ENERGIES DAY

1st FEBRUARY
2017

PARIS - PORTE DE VERSAILLES - FRANCE

ORGANISED BY

lemarin

IN ASSOCIATION WITH

EREF

European Renewable Energies Federation

PARIS - PORTE DE VERSAILLES - HALL 3

EUOMARITIME & EUOWATERWAYS team up to organise the first European Forum specifically dedicated to flow maritime and inland waterway energies. Come and meet the leading specialists in this field during an exceptional day scheduled within both exhibitions.

EUOMARITIME, the European blue growth exhibition, is now one of the main trade meetings of the European maritime market. Its twin, **EUOWATERWAYS** is the reflection of inland activities as well as the logical junction with ports and multimodal maritime activities and services.

Back in **Paris, Porte de Versailles**, from **31st of January to 2nd of February**, the third edition of this trade fair will put the spotlight on the maritime and the waterways economy as a whole and will maintain the willingness to shed some light on current and prospective issues as well as innovative technologies.

CONFERENCE • BtoB • SPEAKERS • NETWORKING • EXHIBITION

➔ PROGRAM

10:00 am - WELCOME COFFEE

10:30 am

Flow energy is already well-established in Europe, but to what extent?

What is the influence of maritime, river and estuarine flow energy on a continental scale? What is its position in relation to the rest of the world? Does it benefit from sufficient support in terms of national and European policies?

12:00 am - THE EMRenewables COCKTAIL

01:00 pm

Maritime, river and estuary: a multifaceted energy with major economic stakes.

What are the economic issues? What are the financial implications? What are the market solutions?

2:30 pm - PAUSE

3:00 pm

What is the role of flow energy in the family of marine renewable energies?

Can flow energy benefit from the offshore wind power experience?

4:30 pm - CLOSING SPEECH
